Sixteen hundred new county records of British spiders

Summary

A list of about sixteen hundred new county records of British spiders is presented, recorded during the period between June 1994 and June 2000.

Introduction

The county records which follow are additions to those shown on the distribution maps in Locket, Millidge & Merrett (1974) and in subsequent published lists (Merrett, 1975, 1982, 1989, 1995), and have been recorded during the period between June 1994 and June 2000. The counties listed are those which existed before the boundary revisions of April 1974. Records for islands are treated as described in Locket *et al.* (1974: 132). The nomenclature and species order is the same as that used in the revised check list by Merrett & Murphy (2000).

The list includes both published and unpublished records, the principal contributors of the latter being Martin Askins, John Crocker, Stan Dobson, Tom Faulds, Adrian Fowles, Peter Harvey, Dick Jones, Michael Kilner, Edward Milner, David Nellist, Jennifer Newton, Wayne Rixom, Craig Slawson, Jim Stewart and Jim Wright. Many valuable records have also been contributed by other collectors who are too numerous to name, but I wish to thank them all.

Although records are being collected on a 10 km square basis for the spider recording scheme, I think it is still worthwhile to continue keeping the county records up-to-date, and I should therefore be pleased to receive any additional new county records for publication in future lists.
